

# LEG UP LOAN PROGRAM

---

A partnership between Local Energy Generation (LEG) and WCCU

The LEG Up Loan Program offers low interest loans to property owners and businesses that want to reduce energy usage, cut costs in the long run, and practice environmental stewardship. The program is offered through WCCU Credit Union and is available to anyone who lives or works in WCCU's twelve county area. Loans may be obtained for solar, battery storage, wind, or geothermal installations as well as energy efficiency upgrades. The program focuses on maximizing rebates and tax incentives to shorten return on investment.

Local Energy Generation (LEG) is a group of concerned individuals who wish to promote renewable energy and energy efficiency. Members of our group have committed funds at WCCU which allow the credit union to offer below market interest rates for the LEG Up Loan Program. Anyone can join our effort and commit funds in support of the loan program. For more information, check out our website and read testimonials.
